**CONSTRUCTION**

The Sinus Jevi Heatray is a mobile radiant heater with shock proof elements of stainless steel. The casing of the Heatray has a red epoxy-coating. The total power is 3 kW but can be switched in 3 steps (1000, 2000 and 3000 Watt). The Heatray is supplied with a black bracket and 5 meter cable.

**APPLICATION**

The rays of infrared heating directly heat the object, person, animal or machine affected by the rays instead of the surrounding. This makes infrared heating particularly suitable for use outside or in large, unheated spaces. You will not experience any air movement, unpleasant light or flue gases.

The Heatray is particularly suitable for use in the workplace, in both large and small spaces such as factories and markets but also for painters and so on.

TECHNICAL DATA		
Type	Heatray	
Power	3 kW	
Adjustability	1 - 2 - 3 kW	
Voltage	230 Volt	
Current Intensity	13.1 A	
Article number	720 095 0001A	
Weight	24 kg	
Dimensions	Width	590 mm
	Depth	500 mm
	Height	1100 mm

Sinus is one of the pioneers in the field of explosion proof heating equipment, today we are still operating at the forefront. We manufacture according to ATEX as well as IECEx and EAC directives.

For the production of Ex-proof equipment a PQAN (Product Quality Assurance Notification) is issued by TUV-Nord. Our ISO-9001 and ISO-14001 systems are also monitored by this organisation.
